

# Guide for Importing Patton Object Model

**Step 1:** Go to the URL - <https://github.com/TestLeafPages/SelDec/blob/master/PatternObjectModel.zip>

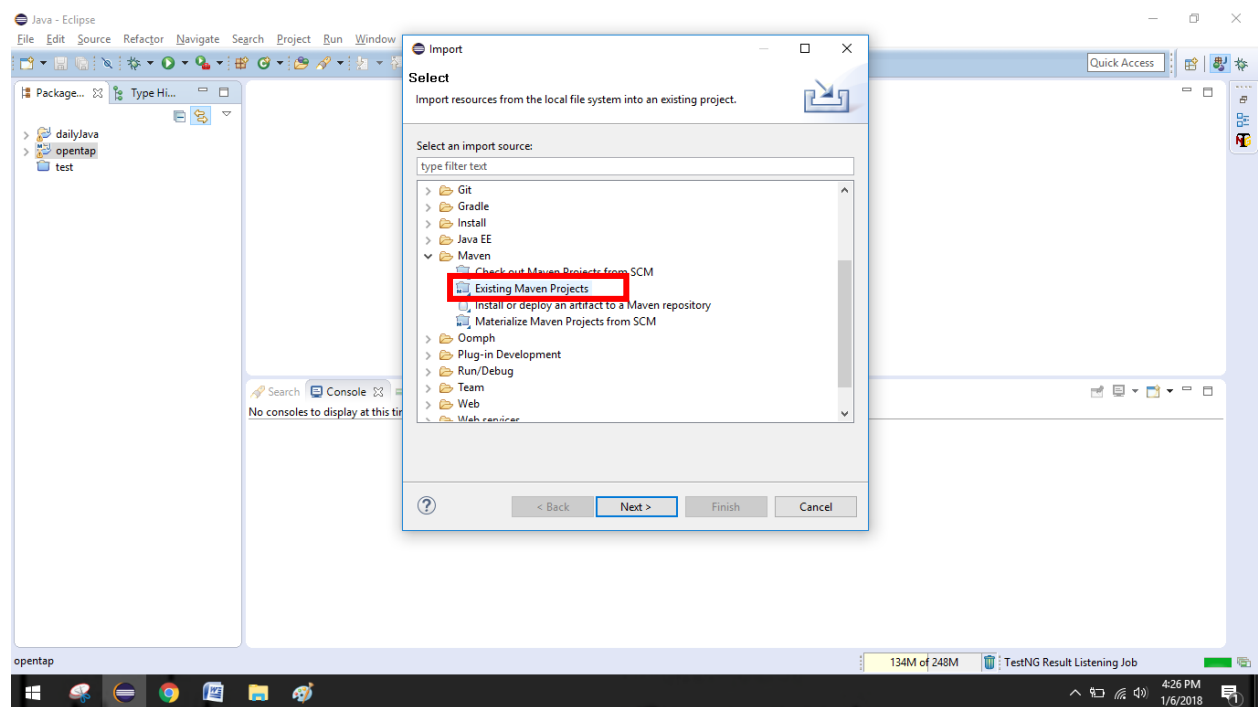

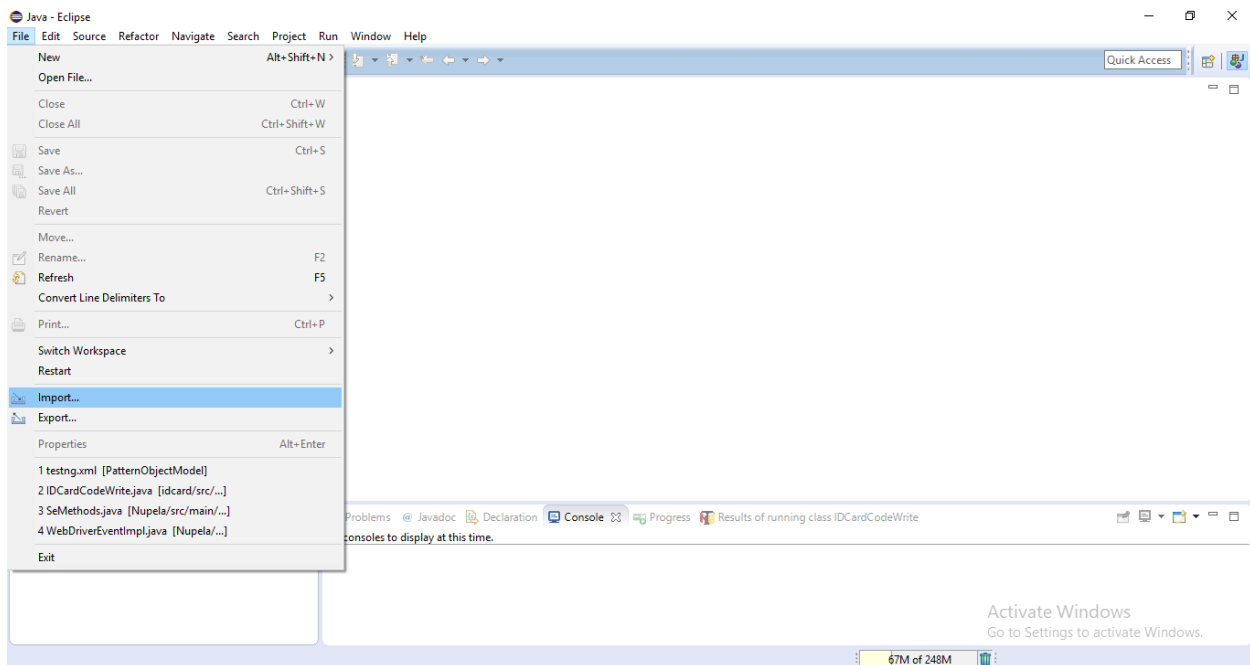

**Step 2:** Click on download, PatternObjectModel.zip will be downloaded.

**Step3:** Extract it to local.

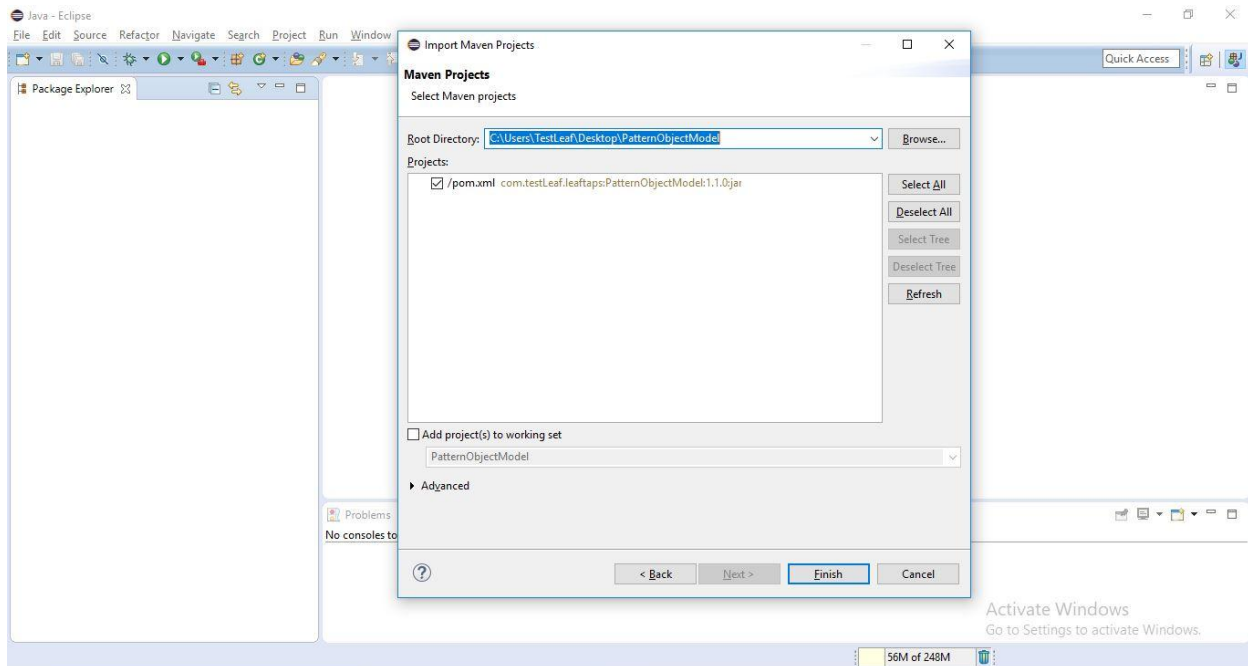

**Step 4:** Open your eclipse. Click on File from Menu -> Import -> Maven -> Existing Maven Project and click on next

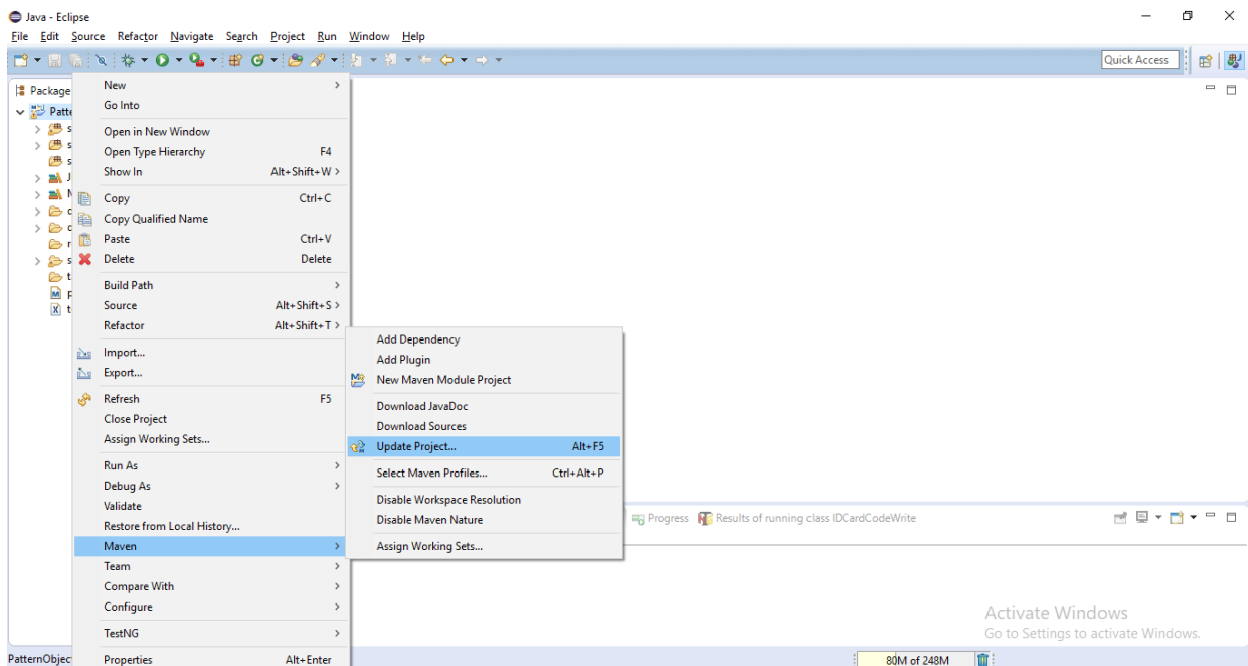

**Step 5:** Browse the extracted file

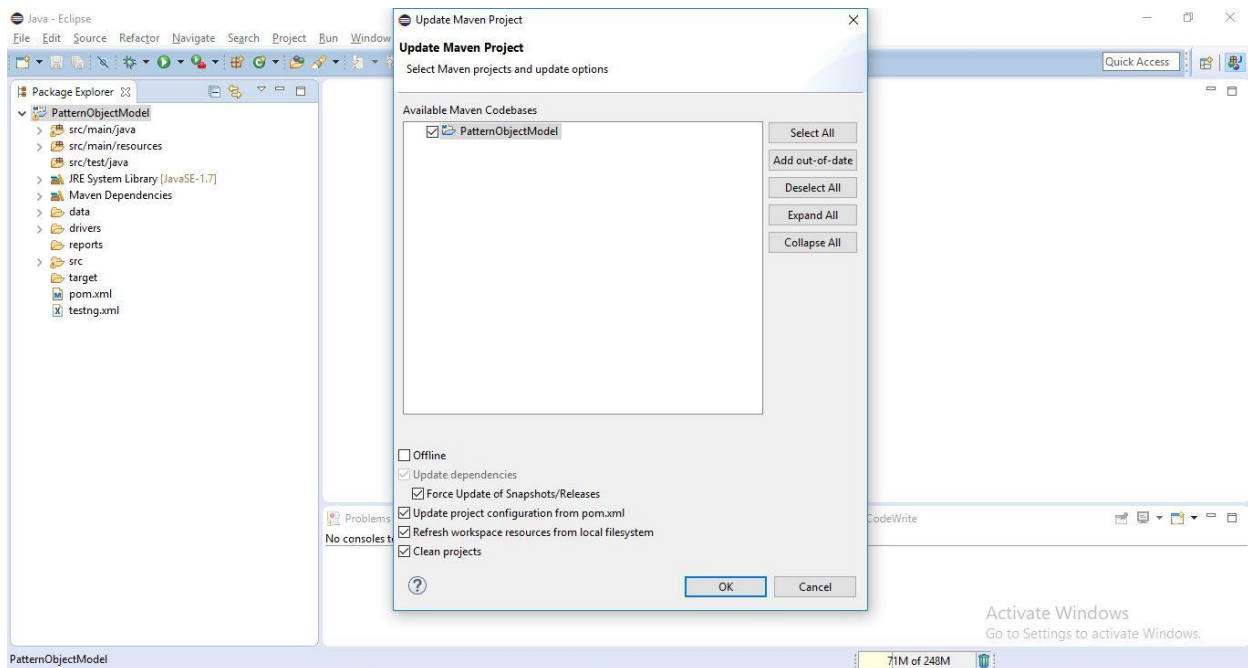

**Step 6:** Make sure pom.xml with checkbox is selected

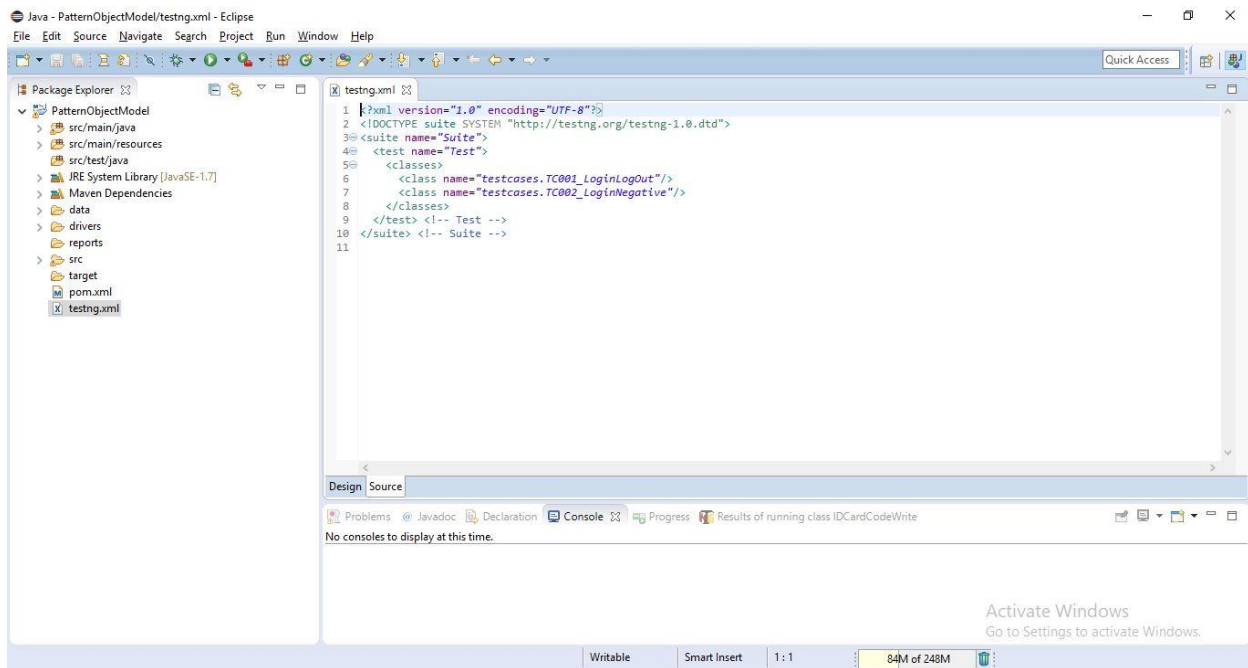

**Step 7:** Click on Finish. A new project with name PatternObjectModel would have been added to your workspace.

**Step8:** Force update your project, if there is any error in pom.xml or in project. (Right click on Project=> Maven=> Update Project=> click on Force update checkbox and click on ok.

**Step 9:** Run the testing.xml and confirm that reported is generated.

**Step 10:** Now you are good to go.
